[Description](#)

reading through the lcb docs, trying to pick it up, again - i realized that there are no default editors for the various datatypes, and they have to be declared with metadata.

certain types (e.g. integers) really should have a default editor, e.g. `com.livecode.pi.number`

[Comment 1](#)

Hello Mike,

Thank you for the report.

I confirm what you describe.

We will update you when the status of this report changes.

Kind regards,

Panos
