[Description](#)

set the printpaperorientation to "landscape" doesn't work. Despite the settings, printing is always done in portrait format.

**eric.miclo** 2008-10-02 02:03:58 EDT

[Comment 1](#)

The bug is still in an "unconfirmed" status despite the fact it is really easy to confirm.

**eric.miclo** 2009-02-10 05:49:43 EST

[Comment 2](#)

Why report bugs if they stay unconfirmed?

**eric.miclo** 2009-04-10 13:37:19 EDT

[Comment 3](#)

Bug still present in version 3.5 gm-1 and still in an "unconfirmed" status that would take 2 minutes to confirm.

[Comment 5](#)

Bug still not resolved in version 4.0 and still leaved as unconfirmed.

Is there really a Linux support?

**Richard Gaskin** 2010-07-10 22:53:25 EDT

[Comment 6](#)

Confirmed with v4.0 on Ubuntu 10.04. Tried several ways to get this to work, none worked. Interestingly, not even the options in Page Setup affect how Rev prints.

[Comment 9](#)

And it is not working with LiveCode 7 on OS X Yosemite.

Opened more than 6 YEARS ago and still in "NEW" status.

**Sam Norris** 2017-07-14 12:17:09 EDT

[Comment 10](#)

Still present in 8.1.6 RC-1

[Comment 12](#)

Hello all,

I have tried:

```
on mouseUp pButtonNumber
  set the printPaperOrientation to "landscape"
  print this card
end mouseUp
```

and the output (i.e. the card) is printed on landscape, as expected.

Tested on MacOS 10.13.4, using LC 9.0.2 rc-1.

I am closing this report.

If you follow a different recipe and still see this bug, please feel free to reopen this report and provide an alternative recipe.

Kind regards,  
Panos
